PROFILE

Software Engineer with a strong frontend background and experience building digital products end-to-end. My work spans requirements analysis, product design, frontend architecture, backend implementation, workflow automation, and production delivery. I enjoy combining engineering, product thinking, and AI-assisted development to build solutions that create value for both users and businesses. Experienced working in fast-paced environments where changing priorities, technical decision-making, and continuous delivery were essential to business success.

ACHIEVEMENTS

- Led the technical direction for multiple product initiatives in a rapidly changing environment.
- Defined frontend architecture and reusable standards adopted across multiple projects.
- Designed end-to-end solutions, from requirements analysis and UX/UI design to production deployment.
- Served as the technical reference for complex frontend challenges and architectural decisions.
- Introduced AI-assisted development workflows that improved engineering productivity.
- Streamlined development workflows through CI/CD improvements and automation.

PROFESSIONAL EXPERIENCE

Senior Frontend Developer / Frontend Lead | 2024-07 — Present

ICASH.ONE / Montevideo - Uruguay

Led the technical implementation of digital products across the entire development lifecycle, contributing to product discovery, frontend architecture, backend services, database design, workflow automation, and production delivery.

Technologies: TypeScript, JavaScript, React, Redux, Tailwind, Zustand, CSS/SCSS, Material UI, Radix, shadcn, Prime React, Nx, Formik, i18n, HTML, Webflow, Java, SQL

Frontend Software Engineer | 2022-03 — 2024-07

IUGO Software & Design Studio by Domus Global / Montevideo - Uruguay

Developed enterprise web applications for international clients through staff augmentation projects, contributing to product development from technical analysis and UI implementation to frontend architecture and production delivery. Worked closely with multidisciplinary teams to build scalable, maintainable, and user-focused solutions.

Technologies: TypeScript, JavaScript, React, Redux, Tailwind, Zustand, Next.js, Vue, Vuex, Nuxt, CSS/SCSS, Material UI, PrimeReact, Bootstrap, Formik, i18n, HTML

Cloud Analyst Developer | 2020-05 — 2021-09

Replica / Lima - Peru

Developed web applications, cloud-based solutions, and digital platforms, contributing to frontend development, cloud infrastructure, database management, and deployment. Worked across multiple technologies to deliver complete solutions from implementation to production.

Technologies: Vue, Vuex, Nuxt, React, JavaScript, HTML, CSS, Material UI, MJML, jQuery

Freelance Frontend Developer | 2019-01 — 2020

Independent

Designed and developed custom digital solutions for clients, managing projects from requirements gathering and interface design to implementation and deployment.

Technologies: JavaScript, HTML, CSS, React, Bootstrap, D3, jQuery

SKILLS

AI-Assisted Software Development, Claude, Cursor, Product Development, UX/UI Design, Design Systems, Figma, Stitch, Client-side Rendering, Performance, n8n, UX Analytics, Module Federation, Responsive Design, GitHub Workflows

EDUCATION

Information Systems Engineering | 2015-03 — 2019

Universidad Tecnologica Nacional / Buenos Aires - Argentina. Not completed.

Languages: English - Intermediate
