## PROFILE

Software Engineer specializing in frontend engineering, technical leadership, and end-to-end product development, from architecture and UX decisions to implementation.

## PROFESSIONAL EXPERIENCE

- **Software Engineer | Independent**

**Oct 2026 – Present**

Building independent software projects, exploring product ideas, and applying AI-assisted development across frontend, backend, and workflow automation.

- **Senior Frontend Developer / Forward Deployed Engineer | ICASH.ONE** · Fintech

**Jul 2024 — Jul 2026** · Uruguay.

Led frontend engineering and technical decisions across multiple financial products, combining architecture, UX/UI, and hands-on development with contributions to backend systems and automation.

- **Built a multi-currency user portal from scratch** for users across Asia, Latin America, and Africa, implementing frontend, backend, SQL integration, and analytics to provide access to account balances and transaction histories.
- **Designed a modular, multi-client frontend architecture using Module Federation**, supporting client-specific themes, module configurations, and API integrations through build-time and runtime configuration. Migrated applications from Create React App to Vite.
- **Led the design and development implementation of several product features,** translating operational requirements and marketing feedback into user flows, Figma prototypes, and documented use cases while coordinating implementation across web, backend, and mobile.
- **Led and mentored incoming team members**, including frontend developers and designers; reviewed code, coordinated design work, and made architectural and UX/UI decisions across multiple products.
- **Modernized legacy interfaces and design systems**, and contributed to internal tools and marketing automations.

- **Frontend Software Engineer | IUGO Software & Design Studio by Domus Global** · Staff Augmentation

**Mar 2022 — Jul 2024** · Uruguay

Contributed to fintech and educational platforms through staff augmentation, implementing new features, redesigning user interfaces, and extending administrative and support tools.

- **Cloud Analyst Developer / Software Developer | Replica** · Microsoft Partner

**May 2020 — Sep 2021** · Perú

Worked on web applications and cloud-based solutions, including e-commerce, corporate websites, and database-related tasks, using Azure, Microsoft, and Power Platform technologies.

- **Freelance Software Developer | Independent**

**Jan 2019— May 2020** · Remote

## TECHNICAL SKILLS

- **Frontend Engineering**: React, Next.js, TypeScript, JavaScript, Vue.js, Nuxt.js, Redux, Zustand, HTML, CSS, Tailwind CSS, Material UI, PrimeReact, Radix UI, shadcn/ui, i18n.
- **Architecture & Performance**: Frontend Architecture, Module Federation, Nx, Design Systems, Responsive Design, Performance Optimization.
- **Backend & Data**: Java, SQL, MySQL, REST APIs, PostgreSQL, SQL Server.
- **AI & Automation**: AI-Assisted Software Development, Claude, Cursor, n8n, Brevo, MJML.
- **Cloud & CI/CD**: AWS, Azure, GitHub Actions, Bitbucket.

## EDUCATION

**UX/UI Designer | Google**

Aug 2026 — Oct 2026 · Coursera

**English Language Studies | Wall Street English** · CEFR blended language-learning

Aug 2026 — Present · In Progress

**Information Systems Engineering | Universidad Tecnológica Nacional / Buenos Aires - Argentina**

Mar 2015 — Dec 2018 · Coursework completed; degree not completed.
